Excerpt from Internal, External, and Pragmatic Influences: Technical Perspectives in the Development of Programming Languages We shall see that the dictions of mathematics serve very adequately to define the internally motivated portions of a program, and that closely related dictions can be used to describe the algorithms which allow mathematical operations to be realized with acceptable efficiency. Beyond this, other mathematical questions, having to do with verification of algo rithm correctness and transformation of programs between equivalent forms having different levels of efficiency, attach naturally to the internally motivated aspects of programs.
