# LINEAR MODELS IN THE MATHEMATICS OF UNCERTAINTY

Springer Berlin Heidelberg Feb 2013, 2013. Buch. Condition: Neu. Neuware - The purpose of this book is to present new mathematical techniques for modeling global issues. These mathematical techniques are used to determine linear equations between a dependent variable and one or more independent variables in cases where standard techniques such as linear regression are not suitable. In this book, we examine cases where the number of data points is small (effects of nuclear warfare), where the experiment is not...
