Security vs. Access: Balancing Safety and Productivity in the Digital School

By Leanne K. Robinson, Abbie Brown, Timothy D. Green

International Society for Technology in Education, United States, 2010. Paperback. Book Condition: New. 213 x 137 mm. Language: English . Brand New Book. Better safe than sorry isn't always as simple as it sounds. Security threats from the Internet and other technologies are very real, and schools have an obligation to keep their students, staff, and property safe, but implementing drastic security measures can often create an environment of fear and significantly reduce teachers ability to provide students with a high-quality education. Overly cautious security measures often have unintended consequences. Disabling USB ports may prevent data theft, but it also inhibits collaboration. Strict copyright guidelines can prevent lawsuits but may also preclude teachers from legally using digital video that enhances a lesson or helps a student grasp an otherwise elusive concept. Security vs. Access emphasizes the importance of balance in creating school environments that are safe and productive. The book provides educators, administrators, and IT staff the information they need to have constructive conversations about security challenges while still making sure students receive an effective, technology-infused education. The authors examine security issues, including access to inappropriate content, network security, and identity theft. They discuss common responses and provide realistic...
