Hoc Networks
Modeling and Analysis

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Modeling and Analysis | Recent technological advances in wireless communication have offered novel solutions to enable vehicles to communicate through a decentralized system. An emerging solution is the Vehicular Ad Hoc Networks VANETs, in which a source vehicle cooperates with the intermediate vehicles in receiving and delivering messages to the location of the destination vehicle. Effectively determining the location of the destination vehicles is a challenging problem due to their fast and...
